# CONVINCINGLY SIMPLE

Versatility of the highest standard.

Main menu with various group keys

Cocktail selection – Tropical group key

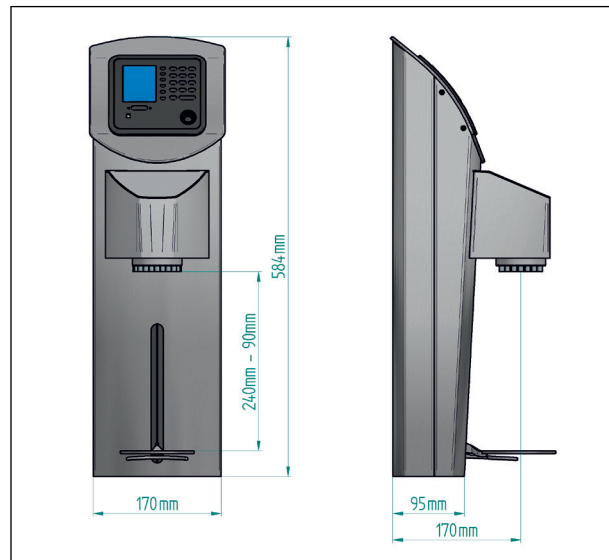

## Really impress your customers and your staff with the VISO Multitower!

Nothing convinces customers more than a perfectly mixed cocktail! They mustn't be too sweet, too watery, too strong or too weak. The simple and intuitive operation of the VISO Multitower assists you and your staff, guaranteeing the best possible quality and consistency of your cocktails.

A few of the highlights include: the group keys, developed in-house; the vertically adjustable drip tray; and a recurrent reminder function for cleaning.

Up to 42 different ingredients (including soft drinks and spirits) can be directly measured out with the Multitower. This allows all 625 cocktails to be matched to the customer's wishes and also to create individual mixtures for regular customers. Ingredients such as Cola or Tonic can likewise be drawn from the dispenser or alternatively be drawn as credit from the LIBRA weighing drawer system.

Of course the VISO Multitower can be used as an optional extension or in combination with all other products from Gruber Schanksysteme.

Vertically adjustable drip tray suitable for all standard cocktail glasses
