

VISO[®]

— BIERsäULE —

designed for extra profit

TIMELESS BEER PLEASURE TRIP

Delights connoisseurs and gourmets.

The VISO beer column presents itself of timeless elegance with the known displays of the VISO family.

Design, functionality and tapping behaviour, as with each facility licensed by Gruber Schanksysteme, get special attention, because a built-in style beer column creates a bar character. The combination of a traditional draft beer with our long-standing dispensing know-how and our experience in this field provide you with many advantages.

Tapping the „perfect beer“ becomes very easy for everybody due to adjustable speed- and quantity limits. It is also possible, as in a traditional beer tapping device, to interrupt the dispensing operation at all times and to continue at a later time. Additionally the VISO beer tapping device can be combined and extended with all components of Gruber Dispensing systems. All functions like further beverages or working in the debit- and/or credit mode are possible and applicable.
